

CELEBRATING
40 years of excellence
in Singapore at
PCS Pte. Ltd.

As we celebrate 40 years of operations and 20 years without a Lost Time incident, we are more committed than ever to pursue growth in a sustainable way to make PCS a place that our employees can call their second home.

Hisashi Shibayama
Managing Director, PCS

PCS, formerly Petrochemical Corporation of Singapore, began operating Southeast Asia's first petrochemical plant in Singapore in 1984.

Today, PCS' facilities span 175 hectares.

That's over 325 football fields!

PCS' team of over 400 employees work to supply essential feedstock to an expanding network of downstream companies.

These companies then manufacture products used in electric vehicles, electronics, optical displays, solar panels, and more.

PCS is also committed to driving sustainability and innovation in the chemicals industry.

The Microfiltration Pre-treatment System (left) and Reverse Osmosis System (right) work in tandem to treat and recover industrial wastewater for process use

PCS' full sustainability efforts include:

- » **Enhancing plant energy efficiency**
- » **Focusing on carbon capture, utilisation, and storage (CCUS) technologies**
- » **Supporting circularity and bio-based solutions**
- » **Adopting renewable energy initiatives**
- » **Conserving and recycling critical resources**

Along with its 40th anniversary, PCS is also marking a major milestone - 20 years without Lost Time incidents.

It reflects the dedication and vigilance of PCS employees in adhering to stringent safety protocols and fostering a culture of safety.

A **Lost Time incident** refers to an incident that results in time lost from work.
